# **MIDC Annual Report 2013**

Prepared and submitted by Kristine Salmonson, Intelligence Dispatcher at MIDC

Missoula Interagency I	Dispatch Center Annu	ai Keport 2013	

This report summarizes the 2013 fire season within the South West Montana Dispatch Zone and Missoula Interagency Dispatch Center's Initial Attack area. A special thanks to all that helped gather statistics for this report; Tim Bradley for the original format of the report; Joy Williamson for the aircraft portion; Kerry Cassidy for the equipment portion; Cobey Williamson for gathering SWLO's 30 year fire averages; Jack Curry for gathering CSKT's 30 year fire averages; and Mark Wilson for providing a summary of 2013's seasonal weather and severity.

MIDC's initial attack area consists of federal, state, and private lands protected by Missoula Unit DNRC of the Southwestern Land Office (SWLO), Missoula, Ninemile, and Seeley Lake Ranger Districts of the Lolo National Forest.

MIDC provides support services to Clearwater Unit / Lincoln IA Station, Anaconda Unit / Garrison IA Station of Montana DNRC SWLO; Plains Dispatch Center, whose main service is to Plains Unit DNRC of the Northwestern Land Office (NWLO), Superior and Plains-Thompson Falls Ranger Districts of the Lolo National Forest; Ronan Dispatch, whose main service is to the Confederated Salish and Kootenai Tribes on the Flathead Reservation, the National Bison Range, Ninepipe National Wildlife Refuge, and Pablo National Wildlife Refuge.

Missoula Interagency Dispatch Center (MIDC) dispatched IA resources to 459 local incidents and tracked 1317 flights. Aside from aircraft flight following, the majority of WildCAD incidents recorded at MIDC were wildfires, with the second highest number going to smoke checks.

2013	FIRES	ACRES
USFS-LNF Lightning	115	6918
USFS-LNF Human	66	6351
DNRC-SWLO Lightning	52	11078
DNRC-SWLO Human	80	1344
DNRC-PLN Lightning	13	13
DNRC-PLN Human	9	12
FHA-CSKT Lightning	39	574
FHA-CSKT Human	66	2060
TOTAL	440	28350

#### **Averages:**

The tables to the right summarize the average fires and acres for the past 30 years for the 3 land based agencies within the Southwest Montana Zone.

BLM's Missoula Field Office does not have suppression responsibilities for BLM land within the zone.

DNRC's Southwestern Land Office (SWLO) has responsibility for fire suppression on all BLM lands within the SW MT Zone.

Lolo NF	Years	Fires	Acres
<u>5 year</u>	2009-2013	148	4381
<u>10 year</u>	2004-2013	149	18681
<u>20 year</u>	1994-2013	178	18330
<u>30 year</u>	1984-2013	174	14958

SWLO	Years	Average Fires	Average Annual Acres
<u>5 year</u>	2009-2013	124	6437
<u>10 year</u>	2004-2013	134	15376
<u>20 year</u>	1994-2013	142	10784
30 year	1984-2013	144	7477

CSKT	Years	Average Fires	Average Annual Acres
5 year	2009-2013	87	3310
10 year	2004-2013	83	7379

30 year	1984-2013	61	4101

### (4)

#### Fires by Statistical Cause:

In 2013, 44% of the season's fires within Missoula Dispatch Center's initial attack were human caused, and 56% were lightning. There were numerous non-statistical fires (campfires still within the ring and not a threat), and numerous smoke checks that ended up being false alarms.

The chart and table below reflects only fires within MIDC's initial attack area (Missoula Unit, Missoula RD, Ninemile RD, and Seeley Lake RD).

Туре	<u>Fires</u>	Percent
Lightning	97	56%
Equipment	8	5%
Smoking	0	0%
Campfire	28	16%
Debris	19	11%
Railroad	5	3%
Arson	0	0%
Children	2	1%
Misc. / Unknown	13	<b>7</b> %
Powerlines	2	1%

#### Large Fires:

During the 2013 fire season, the Lolo NF hosted 2 Type 2 IMT's; DNRC's Southwestern Land Office hosted 1 Type 2, and 1 Type 1 IMT; and the CSKT hosted 1 Type 2 IMT. Additionally 3 fires on the Lolo NF were managed under ICT3 organizations; DNRC managed 3 Type 3 incidents, and assisted Missoula City FD with 1 Type 3 incident; and CSKT managed 5 Type 3 incidents.

#### **Prescribed Fire Accomplishment:**

The Lolo National Forest treated 3,877 acres with management-ignited burns during 2013. The DNRC Southwestern Land Office treated 494 acres, all of which were hand and machine piles. BLM's Missoula Field Office treated 119 acres, and the Confederated Salish and Kootenai Tribes treated 7,195 acres.

#### Resource Orders:

The first large fire of the season was the Rumsey Gulch fire. The fire started on May 13th in Granite County's protection and was soon taken over by a Type 3 organization managed by DNRC's Anaconda Unit.

The Lolo NF had their first large fire July 8th, and on July 9th, MIDC brought in the first Support Dispatcher for Expanded Dispatch to help with supply and equipment requests for the Black Bear fire on Ninemile RD. We were short staffed due to the fact that we had sent 4 of our regular staff to Alaska to help with multiple large fires they were experiencing.

On July 14th, West Mullan fire started on Superior RD and also the Rough Creek fire on the Clear-Nez took off. We quickly had to ramp up our expanded dispatch operation to support the mobilization of Heintz T2 IMT for West Mullan and Fry's T2 IMT for Rough Creek. With the increased large fire activity locally and with our neighbors, we also needed to activate an equipment inspection site at MIDC to support all the requests we were getting for agency and contract equipment. It was definitely a challenge for the first 48 hours, having to bring dispatchers and equipment inspectors in because our "regulars" were on assignments elsewhere. This threw us into a fully expanded dispatch operation at MIDC that lasted through September.

The MT DNRC brought down a Canadian heli-rappel crew and two Canadian helitack crews by utilizing agreements under the Northwest Compact, and activated the Montana National Guard to assist in suppression efforts locally and state-wide.

We remained busy with our own incidents as well as lending support to our neighbors, and to other geographical areas. MIDC closed expanded operations on September 24<sup>th</sup>.

The chart below summarizes the number of resource orders that were processed in ROSS at Missoula Interagency Dispatch Center (MIDC). Each category, with the exception of overhead and supplies, are addressed further in the following report by functional area.

Req Catalog Name	Enter*	Delete	Place*	Retrieve*	Fill*	Unfill	Reassign	Release	Cancel*	Cancel UTF	UTF*

#### Crews:

The following spreadsheets reflect assignments for the crews that are dispatched out of MIDC. We hosted many crews from all across the country, including Type 2IA crews from as far away as Maine, Vermont, and New Hampshire.

The following equipment report was prepared by to Kerry Cassidy, Equipment Dispatcher at MIDC.

In 2013 Missoula Interagency Dispatch Center inspected contracted equipment on site at MIDC and then moved the inspection site to the old soils lab at Fort Missoula when the fire activity increased. This new site was more efficient for the inspectors and contractors due to its size, easy access and ability to handle large pieces of equipment. It also enabled us to set up a small ground support unit that was utilized by local incidents.

The following chart is data from the ROSS workload reports.

For rentals almost 70% were pickup trucks with those being mainly extended or crew cabs. Most of these were ordered to be used by the Canadian crews and Type 2 IA crews that came from the Eastern Area.

Starting this year we began putting not only the E # on the windshield but also the incident name which helped in sorting out the vehicles as they were mobed, demobed or reassigned.

In addition to our inspectors we were supported by Incident Contract Project Inspectors (ICPI) to follow up on equipment issues at the fires as well as contract issues. The ICPI's were also available to do inspections at the incidents on the equipment that was sent directly to initial attack fires and did not receive an inspection prior to being dispatched.

The following aviation report was prepared by Joy Williamson, Aircraft Dispatcher at MIDC.

The Missoula Aircraft stats are taken from November 1<sup>st</sup> 2012 through Oct 31<sup>st</sup> 2013. This year we had 1317 total flight days. The following graphs will show the workload breakdown, busier months, fires reported by, detection flights, and aircraft tracked by type.

This year during our most active time there was a shortage of aircraft to go around. Between July 1st and September 30 the Aircraft Desk placed 297 Aircraft orders up to NRCC, 90 of those were UTF'd. The Lolo Creek Complex had 30 of these UTF's. All of us on the aircraft desk are extremely appreciative of each and every person who assisted with the aircraft sharing that went on this past season. Everyone from the IC's, districts/units, neighboring dispatches and Forests/State aided in this endeavor of sharing what aircraft we did have to the fires that needed them.

The graphs below show a few of our busiest months. In May we had five forests order aircraft for prescribed fire on the On-Demand Project Contract. Out of the 20 scheduled Rx flight days in May, 15 were completed, 5 cancelled.

August was definitely our busiest month especially those days from the 15<sup>th</sup> through September 7<sup>th</sup>. On our busiest day we were tracking 38 aircraft.

The graph below shows who reported the fires. Keep in mind these numbers are only the numbers pulled from the MIDC Cad system which include 9-mile, Seeley, Missoula Districts and Missoula Unit.

The second graph is how many detection flights flown both state and federal. Detection flights found 23 fires this season on the 9-mile, Seeley, Missoula Districts and Missoula Unit.

The first graph shows the combined aircraft tracked by type. The second is just the local. Bear in mind these local numbers are only the aircraft Missoula Aircraft dealt with. These numbers do not include all aircraft numbers from the West ½ of the Lolo or Tribe.

"Flight of Three": photo taken by Mark Nanke, of MT National Guard, DNRC, and Canadian Helitack ships.

#### Seasonal Weather and Severity:

The first "Thunder Snow" of 2013 in the Missoula area occurred on March 6<sup>th</sup>. It snowed in the morning, then cleared a little and then late afternoon a thunder storm rolled through with lightning, graupel, hail, and then a rain/snow mix; a rare event in southwest Montana. This "event" got some folks wondering what was in store for us for this fire season.

See graphics below for an idea of what conditions will cause a thunder snow event.

The 2013 fire season started early with numerous human caused fires in April, May and June with generally above average ERCs. Lightning fires kicked in heavy by mid-July through August. Late June was the beginning of a rapid drying trend within the SW Zone. The ERCs began a rapid climb in late June reaching above the 97<sup>th</sup> percentile by late July when they received a brief reset of moisture. Then the ERCs climbed above the 90<sup>th</sup> percentile by late August and before beginning a steady decrease with fire season moderating by early September.

The major influences of weather and severity in 2013 can be summarized by an increase in human caused fires, average to above average lightning and the rapid drying late June and July.

#### Missoula Interagency Dispatch Center Annual Report 2013

The charts below show 2005 and 2007 as comparison years because both years were large fire years locally. 2005 was a busy fire season but didn't burn as many acres as 2007

\*CLW SIG is comprised of both Clearwater Stations; 241517 (manual converted to RAWS in 2010) and 241520 (RAWS replaced the manual station in 2010).

The first expanded dispatch crew at MIDC for 2013. Thanks for your support!
